PROFESSIONAL SUMMARY

I am a highly motivated and analytical Master's in Cyber Security student, having completed and passed all course requirements and set to graduate in July 2024. With a robust work ethic and a passion for cybersecurity, I bring expertise in implementing, maintaining, and monitoring advanced security measures. I excel in both independent and team settings, consistently meeting challenging deadlines and adapting to evolving priorities. I am eager to join a collaborative and innovative team where I can leverage my skills and enthusiasm to make a significant impact in the retail sector. Open to travel and new challenges, I am dedicated to continuous learning and growth in the field of cybersecurity.

EDUCATION

07/2022 – 07/2024: Master of Cyber Security

Griffith University - Gold Coast, Australia

Grade Point Average: 6.44/7

Key courses: Fundamentals of Cyber Security, Python & Java Programming, Digital Forensics, Secure Development Operations, Computer Systems and Networks, Data Communication, Offensive Network Security.

2010 – 2014: Bachelor of Tourism Management

University of Social Sciences and Humanities – HCMC, Vietnam

Grade Point Average: 7.3/10

PROJECTS

• **Secure Development Operations**

- Collaborated with team members to deploy a web application efficiently by utilising Docker and Kubernetes, resulting in deployment time reduction.
- Identified and addressed 6 vulnerabilities in Java code snippets through a combination of automated and manual testing using the ZAP tool, demonstrating a commitment to secure coding best practices.
- Provided detailed justifications and remediation strategies for each identified vulnerability, maintaining a secure coding standard.

• **Digital Forensics**

- Utilised diverse forensic tools, including Sleuth Kit, Wireshark, Network miner, and Volatility, to successfully extract data from various devices and maintained data integrity during the collection and

analysis process.

- Conducted an in-depth report on Android mobile device and embedded systems forensics, achieving 87% grade for the single project.

• **Privacy Impact Assessment (PIA)**

- Collaborated with team members to undertake privacy impact analysis and compliance check for a selected company, as well as privacy management, including addressing potential privacy risks, and existing controls.
- Delivered specific recommendations and strategies for data protection, including technical, procedural, and organisational measures, achieving an excellent grade for recommended actions.
